- Mann Williams (Structural Consultant)
- Twelve Architects (Escapade Architect)
- HG Group (Main Contractor)
- Cube (Structural Engineer)
- Illman Young (Landscape Architect)

Project Brief

The Escapade development is a brand new short stay accommodation concept that will attract motoring enthusiasts. The development includes 60 residences with a total area of 10,575m² and an 800m² clubhouse with 62 dedicated car parking spaces.

cube_design worked to support the design team throughout the detailed design to ensure that the client's aspirations were maintained, whilst providing a planning consultancy.

The clubhouse will underpin the social club aspect of the development, providing a spa-type facility, with pool, a small gym and treatment rooms. The main clubhouse also provides meeting rooms and

a roof terrace with excellent views of the track.

Four different types of residences have been developed and set within a natural landscape setting.

The residences are carefully positioned to optimise views to the track whilst also providing views between the residences, privacy and a range of settings.
